Attaches wood to wood.

**Specifications:**

- Meets ASTM<sup>1</sup> A 510 for carbon steel manufacturing
- Product meets ASTM B-117 for salt spray corrosion testing

**Features:**

- WAR coating exceeds 1,000/hr. salt spray resistance
- Designed to work with ACQ treated lumber
- Star Drive prevents cam out and stripping for improved driveability
- Type '17' reduces wood splitting and eliminates the need for pre-drilling
- Nibs under head provide flush finish

**Coating:** The WAR coating is a high-grade metal surface processing technology that prevents corrosion. The system consists of three layers: a metallic zinc layer, a hex-chromium or trivalent chromate passivation, and a high-grade anti-corrosion chemical conversion film.

**Installation:** A standard screw gun with torque limiting nose piece set at a maximum of 3000 RPM drive speed recommended. Use a T-25 Star drive bit. Do not over torque as it can cause the head to snap or damage to the work surface.
